FOR THE QUARTER ENDED
JUNE 30, 2006, 2005 AND 2004

1 BASIS OF PRESENTATION

Basis of Presentation

The accompanying unaudited consolidated financial statements of Innovative Food Holdings, Inc. (“IVFH”) and subsidiary (collectively, the “Company”) have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. They do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for a complete financial statement presentation. U.S. accounting principles also contemplate continuation of the Company as a going concern.

Acquisition and Corporate Restructure

We were initially formed in June 1979 as Alpha Solarco Inc., a Colorado corporation. From June 1979 through February 2004, we were either inactive or involved in discontinued business ventures. In February 2003 we changed our name to Fiber Application Systems Technology, Ltd.

On January 26, 2004, through a share exchange, the shareholders of Food Holdings, Inc., (“FII”) converted 10,000 shares (post-reverse split) of FII common stock outstanding into 25,000,000 shares (post-reverse split) of IVFH. On January 29, 2004, in a transaction known as a reverse acquisition, the shareholders of IVFH exchanged 25,000,000 shares (post-reverse split) of IVFH for 25,000,000 shares (post-reverse split) of Fiber Application Systems, (formerly known as Alpha Solarco), (“Fiber”) a publicly-traded company. The shareholders of IVFH thus assumed control of Fiber, and Fiber changed its name to Innovative Food Holdings, Inc. The 25,000,000 shares (post-reverse split) of Innovative Food Holdings are shown on the Company’s balance sheet at December 31, 2003 as shares outstanding. These shares are shown at par value of \$2,500 as a decrease of additional paid-in capital at the acquisition date of January 29, 2004. There were 157,037 shares (post-reverse split) outstanding in Fiber at the time of the reverse acquisition; the par value of these shares, or \$16, was transferred from additional paid-in capital at the time of the reverse acquisition.

2. NATURE OF ACTIVITIES AND SIGNIFICANT ACCOUNTING POLICIES

Business Activity

FII is in the business of providing premium white tablecloth restaurants with the freshest origin-specific perishables and specialty products direct from its network of vendors to the end users (restaurants, hotels, country clubs, national chain accounts, casinos, and catering houses) within 24-48 hours, except as stated hereafter, eliminating all wholesalers and distributors. We currently sell the majority of our products through a distributor relationship with Next Day Gourmet, L.P., and a subsidiary of US Foodservice, Inc. (“USF”), a \$20 Billion broadline distributor owned by Dutch grocer Royal Ahold.

Interim Financial Information

The accompanying unaudited interim financial statements have been prepared by the Company, in accordance with generally accepted accounting principles pursuant to Regulation S-B of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in audited financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. Accordingly, these interim financial statements should be read in conjunction with the Company’s financial statements and related notes as contained in form 10-KSB for the year ended December 31, 2006. In the opinion of management, the interim financial statements reflect all adjustments, including normal recurring adjustments, necessary for fair presentation of the interim periods presented. The results of the operations for the three and six months ended June 30, 2006 are not necessarily indicative of the results of operations to be expected for the full year.

Reclassification

Certain reclassifications have been made to conform prior periods' data to the current presentation. These reclassifications had no effect on reported income.

Going Concern

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which contemplate continuation of the Company as a going concern. However, the Company has reported a net income (loss) of \$1,261,757, \$(723,580) and \$(2,867,040) for the three months ended June 30, 2006, 2005, and 2004, respectively; and \$(2,514,645), \$(1,232,916) and \$(3,595,065) for the six months ended June 30, 2006, 2005 and 2004, respectively; and \$(7,417,910) for the year ended December 31, 2005. The Company also had an accumulated deficit of \$18,015,305 and a working capital deficiency of \$17,797,067 as of June 30, 2006.

The Company cannot be certain that anticipated revenues from operations will be sufficient, to satisfy its ongoing capital requirements. Management's belief is based on the Company's operating plan, which in turn is based on assumptions that may prove to be incorrect. If the Company's financial resources are insufficient the Company may require additional financing in order to execute its operating plan and continue as a going concern. The Company cannot predict whether this additional financing will be in the form of equity or debt, or be in another form. The Company may not be able to obtain the necessary additional capital on a timely basis, on acceptable terms, or at all. In any of these events, the Company may be unable to implement its current plans for growth, repay its debt obligations as they become due or respond to competitive pressures, any of which circumstances would have a material adverse effect on its business, prospects, financial condition and results of operations.

Management plans to take the following steps that it believes will be sufficient to provide the Company with the ability to continue as a going concern. Management intends to raise financing through the sale of its stock or debt instruments in private placements to individual investors. Management may raise funds in the public markets, though there currently are no plans to do so. Management believes that with this financing, the Company will be able to generate additional revenues that will allow the Company to continue as a going concern. The Company expects that this will be accomplished by hiring additional personnel and focusing sales and marketing efforts on the distribution of product through key marketing channels currently being developed by the Company. The Company also intends to pursue the acquisition of certain strategic industry partners where appropriate.

Revenue Recognition

The Company recognizes revenue upon shipment of the product from the vendor. Shipping and handling costs incurred by the Company are included in cost of goods sold.

For revenue from product sales, the Company recognizes revenue in accordance with Staff Accounting Bulletin ("SAB") No. 104, "Revenue Recognition," which superseded SAB No. 101, "Revenue Recognition in Financial Statements." SAB No. 101 requires that four basic criteria must be met before revenue can be recognized: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred; (3) the selling price is fixed and determinable; and (4) collectibility is reasonably assured. Determination of criteria (3) and (4) are based on management's judgments regarding the fixed nature of the selling prices of the products delivered and the collectibility of those amounts. Provisions for discounts and rebates to customers, estimated returns and allowances, and other adjustments are provided for in the same period the related sales are recorded. The Company defers any revenue for which the product has not been delivered or is subject to refund until such time that the Company and the customer jointly determine that the product has been delivered or no refund will be required. SAB No. 104 incorporates Emerging Issues Task Force ("EITF") No. 00-21, "Multiple-Deliverable Revenue Arrangements." EITF No. 00-21 addresses accounting for arrangements that may involve the delivery or performance of multiple products, services and/or rights to use assets. The effect of implementing EITF No. 00-21 on the Company's consolidated financial position and results of operations was not significant. This issue addresses determination of whether an arrangement involving more than one deliverable contains more than one unit of accounting and how the arrangement consideration should be measured and allocated to the separate units of accounting. EITF No. 00-21 became effective for revenue arrangements entered into in periods beginning after June 15, 2003. For revenue arrangements occurring on or after August 1, 2003, the Company revised its revenue recognition.

Income Taxes

The Company accounts for income taxes using the liability method. Under the liability method, deferred income taxes are determined based on differences between the financial reporting and tax bases of assets and liabilities. They are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company is required to adjust its deferred tax liabilities in the period when tax rates or the provisions of the income tax laws change. Valuation allowances are established to reduce deferred tax assets to the amounts expected to be realized.

Disclosures about Fair Value of Financial Instruments

The carrying amounts of the Company's financial instruments, which include accounts receivable and accounts payable, approximate fair value at June 30, 2006.

Inventories

The Company does not currently maintain any material amount of inventory.

Stock-Based Compensation

On January 1, 2006 the company adopted Statement of Financial Accounting Standards No. 123 (revised 2004) "Share-Based Payment" ("SFAS 123 (R)", which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors including employee stock options and employee stock purchases related to a Employee Stock Purchase Plan based on the estimated fair values. SFAS 123 (R) supersedes the company's previous accounting under Accounting Principles Board Opinion No.25, "Accounting for Stock Issued to Employees" ("APB 25") for the periods beginning fiscal 2006.

The company adopted SFAS 123 (R) using the modified prospective transition method, which required the application of the accounting standard as of January 1, 2006. The company's Consolidated Financial Statements as of and for twelve months Ended June 30, 2006 reflect the impact of SFAS 123(R). In accordance with the modified prospective transition method, the company's Consolidated Financial Statements for the prior periods have not been restated to reflect, and do not include the impact of SFAS 123 (R). Stock based compensation expense recognized under SFAS 123 (R) for the three months ended June 30, 2006 was \$0. Pro forma stock based compensation was \$0 for the three months ended June 30, 2006.

Stock-based compensation expense recognized during the period is based on the value of the portion of share-based payment awards that is ultimately expected to vest during the period.

Accounting for Conversion Options Embedded in Convertible Notes and Convertible Interest

The Company has certain convertible notes payable which contain embedded beneficial conversion features. Through August 2005, the beneficial conversion features of these convertible notes were accounted for by the equity method, whereby the intrinsic value of the beneficial conversion features were considered discounts to the notes. These discounts were immediately amortized to interest expense. During September 2005, the number of shares of the Company's common stock issued and issuable exceeded the number of shares of common stock the Company had authorized, and this triggered a change in the manner in which the Company accounts for these beneficial conversion features. In accordance with Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities, as amended ("SFAS 133"), the debt features provision contained in the terms governing the Notes are not clearly and closely related to the characteristics of the Notes. Accordingly, the features qualified as embedded derivative instruments at September 30, 2005 and because they do not qualify for any scope exception within SFAS 133, they were required by SFAS 133 to be accounting for separately from the debt instrument and recorded as derivative financial instruments. In September 2005, the Company valued the beneficial conversion features of its notes payable using the Black-Scholes valuation method, and arrived at an aggregate value of \$12,528,662. Pursuant to Emerging Issues Task Force Issue 00-19 "Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock" ("EITF 00-19") "If a contract is reclassified from permanent or temporary equity to an asset or a liability, the change in fair value of the contract during the period the contract was classified as equity should be accounted for as an adjustment to stockholders' equity." Accordingly, during the year ended December 31, 2005, the Company charged the amount of \$12,445,576 to stockholders' equity. \$5,665,290 of this amount was charged to additional paid-in capital, which brought the balance of additional paid-in capital to \$0. The remainder, or \$6,780,286, was charged to accumulated deficit. During subsequent periods, the conversion option liability will be revalued, and any change in value charged to operations. At June 30, 2006, the conversion option liability was valued at \$6,577,232. The revaluation resulted in a gain during the three months ended June 30, 2006 of \$1,270,054.

The Company valued these embedded conversion options using the Black-Scholes option pricing model with the following assumptions:

	Risk Free Interest Rate	Expected Dividend Yield	Expected Option Life	Volatility
June 30, 2006	4.75%	0	5	141.4%

Accounting for Warrants and Freestanding Derivative Financial Instruments

The Company accounts for the issuance of common stock purchase warrants and other freestanding derivative financial instruments in accordance with the provisions of EITF 00-19. Based on the provisions of EITF 00-19, the Company classifies, as equity, any contracts that (i) require physical settlement or net-share settlement or (ii) gives the Company a choice of net-cash settlement or settlement in its own shares (physical settlement or net-share settlement). The Company classifies as assets or liabilities any contract that (i) require net-cash or (ii) give the counterparty a choice of net-cash settlement in shares (physical or net-share settlement).

The fair value of these warrants is determined utilizing the Black-Scholes valuation model. Through August 2005, these warrants were accounted for by the equity method, whereby the fair value of the warrants was charged to additional paid-in capital. During September, 2005, the number of shares of the Company's common stock issued and issuable exceeded the number of shares of common stock the Company had authorized, and this triggered a change in the manner in which the Company accounts for these warrants and the Company began to account for these warrants utilizing the liability method. Pursuant to EITF 00-19, "If a contract is reclassified from permanent or temporary equity to an asset or a liability, the change in fair value of the contract during the period the contract was classified as equity should be accounted for as an adjustment to stockholders' equity." Accordingly, during the year ended December 31, 2005, the Company charged the amount of \$10,374,536 to stockholders' equity. At the same time, the Company changed the way in which it accounts for the beneficial conversion feature of convertible notes payable (see note 8).

The accounting guidance shows that the warrants and options which are a derivative liability should be revalued each reporting period. The recorded value of such warrants can fluctuate significantly based on fluctuations in the market value of the underlying securities of the issuer of the warrants and options, as well as in the volatility of the stock price during the term used for observation and the term remaining for warrants and options. During the three months ended June 30, 2006, the Company recognized a loss of \$638,829 for the increase in the fair value of the warrant liability and recorded this loss in operations during the three months ended June 30, 2006. The fair value of these instruments was estimated at June 30, 2006, using the Black-Scholes option pricing model with the following assumptions: risk free interest rate: 4.75%; expected dividend yield: 0%; expected option life: 5 years; and volatility: 152.50%.

The value is calculated utilizing the Black-Scholes valuation model.

Insufficient Authorized but Unissued Shares of Common Stock

The Company has a potential obligation to issue shares of common stock, which exceed the number of shares that the Company currently has authorized. The Company recorded a penalty associated with the late registration of shares pursuant to the terms in the underlying convertible notes payable. Critical Accounting Policy and Estimates

Our Management's Discussion and Analysis section discusses our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments, including those related to revenue recognition, accrued expenses, financing operations, and contingencies and litigation. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these Estimates under different assumptions or conditions. There are no significant accounting estimates inherent in the preparation of our financial statements.

Cash provided by financing activities was \$150,000, consisting of \$160,000 of proceeds from the issuance of notes payable offset by \$10,000 in principal payments on notes payable.

Historically, our primary cash requirements have been used to fund the cost of operations, with additional funds having been used in promotion and advertising and in connection with the exploration of new business lines.

Under current operating plans and assumptions, management believes that projected cash flows from operations and available cash resources will be sufficient to satisfy our anticipated cash requirements for at least the next twelve months. As we seek to increase our sales of perishables, as well as identify new and other consumer oriented products and services, we may use existing cash reserves, long-term financing, or other means to finance such diversification.

Critical Accounting Policy and Accounting Estimate Discussion

In accordance with the Securities and Exchange Commission's (the "Commission") Release Nos. 33-8040; 34-45149; and FR-60 issued in December 2001, referencing the Commission's statement "regarding the selection and disclosure by public companies of critical accounting policies and practices", we have set forth in Note 2 of the Notes to Consolidated Financial Statements what we believe to be the most pervasive accounting policies and estimates that could have a material effect on our results of operations and cash flows if general business conditions or individual customer financial circumstances change in an adverse way relative to the policies and estimates used in the attached financial statements or in any "forward looking" statements contained herein.

The Company's cash on hand may be insufficient to fund its planned operating needs. Innovative Food Holdings, Inc. continues to seek funding for working capital requirements, necessary equipment purchases, marketing costs, and other operations for the next year and foreseeable future by raising capital through the sale of equity and/or debt securities, issuing common stock in lieu of cash for services and by advances from shareholders.

We expect that any sale of additional equity securities or convertible debt will result in additional dilution to our stockholders. The Company can give no assurance that it will be able to generate adequate funds from operations, that funds will be available to us from debt or equity financing, or that if available, the company will be able to obtain such funds on favorable terms and conditions. If the company cannot secure additional funds it may have to reduce its operations to be able to continue as a going concern. The Company currently has no definitive arrangements with respect to additional financing.

While we have raised capital to meet our working capital and financing needs in the past, additional financing may be required in order to meet our current and projected cash flow deficits from operations and development. We are seeking financing in the form of equity in order to provide the necessary working capital. We currently have no commitments for financing. There is no guarantee that we will be successful in raising the funds required.

By adjusting our operations and development to the level of capitalization, management believes we have sufficient capital resources to meet projected cash flow deficits through the next twelve months. However, if thereafter, we are not successful in generating sufficient liquidity from operations or in raising sufficient capital resources, on terms acceptable to us, this could have a material adverse effect on our business, results of operations, liquidity and financial condition.

The independent auditors report on our December 31, 2005 financial statements states that our recurring losses raise substantial doubts about our ability to continue as a going concern.

INFLATION

The impact of inflation on the costs of the Company, and the ability to pass on cost increases to its customers over time is dependent upon market conditions. The Company is not aware of any inflationary pressures that have had any significant impact on the Company's operations over the past quarter, and the Company does not anticipate that inflationary factors will have a significant impact on future operations.

OFF-BALANCE SHEET ARRANGEMENTS

The Company does not maintain off-balance sheet arrangements nor does it participate in non-exchange traded contracts requiring fair value accounting treatment.

RISK FACTORS

The Company's business and success is subject to numerous risk factors as detailed in its Annual Report on Form 10-KSB for the year ended December 31, 2006.
